

April 6, 2022

The Honorable Joe Biden
President of the United States
The White House
1600 Pennsylvania Ave. NW
Washington DC 20500

The Honorable Kamala Harris
Vice President of the United States
The White House
1600 Pennsylvania Ave. NW
Washington DC 20500

Dear Mr. President and Madam Vice President:

ABC and our undersigned state chapters and member companies strongly oppose your administration's efforts to encourage and require controversial government-mandated project labor agreements on federal and federally assisted construction contracts funded by taxpayers.

Associated Builders and Contractors and our members are committed to building taxpayer-funded construction projects with the highest standards of safety and quality and stand ready for the chance to build and maintain America's infrastructure. Federally funded construction is also critical to address the nation's infrastructure needs and has the potential to provide significant opportunities, particularly to small construction businesses, as they continue to recover from the effects of the COVID-19 pandemic.

Executive Order 14063 would direct all federal agencies to require PLAs on federal construction projects exceeding \$35 million in total value to "promote the economy and efficiency in Federal procurement." However, multiple studies of hundreds of taxpayer-funded school construction projects found that PLA mandates increase the cost of construction by 12% to 20% compared to similar non-PLA projects. Additionally, guidance from the administration on federal grant and assistance programs has encouraged states and local communities to require PLAs on federally assisted construction projects.

While Congress worked to enact a significant bipartisan infrastructure package and begin the process of modernizing our nation's infrastructure, your administration is taking a dangerously partisan approach that would defy congressional intent and effect the allocation of a significant portion of these funds. ABC and our members are concerned this EO could limit the ultimate success of the bipartisan bill and the communities it is meant to benefit.

PLA mandates unfairly discourage competition from quality, qualified nonunion contractors and their employees, who comprise 87.4% of the private U.S. construction industry workforce. PLA mandates also effectively prevent many small, women-, veteran- and minority-owned construction businesses and their workforce from participating in federally funded construction projects. Importantly, we believe that any federal investment in construction, including our nation's infrastructure, must ensure opportunity to all Americans, regardless of labor affiliation.

In addition, recent government-mandated PLAs on federal and federally assisted projects have resulted in litigation, reduced competition, increased costs, needless delays and poor local hiring outcomes. Simply put, hardworking taxpayers are getting less and paying more when PLAs are encouraged or mandated during the procurement of federal and federally assisted construction projects.

The administration has a unique opportunity to uphold the bipartisan work included in the Infrastructure Investment and Jobs Act (Public Law 117-58) and other legislation that funds critical construction projects throughout the country.

ABC members, along with many other construction employers, provide well-paying jobs and benefits for their employees. ABC and our undersigned state chapters and members support fair and open competition and oppose government-mandated or encouraged PLA requirements on federal and federally assisted projects because hardworking taxpayers deserve more efficient and effective policies that will encourage all qualified contractors and their skilled workforce to compete to build long-lasting, quality projects at the best price.

Sincerely,

Associated Builders and Contractors
