National Contractor of the Year Award
National Contractor of the Year / 30

2018 STEP DIAMOND RECIPIENTS / 31
INDEX OF ALL WINNERS / 32
PROGRAM SPONSORS / 33

Accredited Quality Contractor
is a credential for ABC chapter members* that have documented their commitment to five key areas of corporate responsibility: quality, safety, talent management, education and community relations.

Presented by

*Chapter Specific
The Excellence in Construction Awards honor the skill and creativity of the entire team—contractor, owner, architect and engineer—responsible for an outstanding merit shop construction project. The 2018 award recipients exceeded expectations in innovation and quality.

Engineering News-Record
New York
Careful abatement by EnviroVantage kicked off the long-term historical restoration of the abandoned Wood Island Life Saving Station in Kittery, Maine—helping undo 50 years of neglect in just 52 days.

Four Winds Alternative & CTE High School in North Dakota, which features 264 rooftop solar panels and a geothermal heating/cooling system, is the first net zero building constructed on tribal land in the United States.

The Scott Hamilton Center for Proton Therapy was a complex electrical build from beginning to end. Through virtual design, innovative fabrication and trade collaboration, Gaylor Electric was able to deliver a high-quality specialty cancer care facility.
ISC Constructors re-established and upgraded plant operations with zero recordable incidents after Honeywell UOP experienced a critical power failure on a 15 kilovolt main feeder that crippled operations for the entire facility.

MMR Constructors executed electrical and instrumentation work on Shell Deer Park’s olefins flare gas recovery project, finishing on time, under budget and with zero safety incidents amidst Hurricane Harvey hitting during the 20-month job.

Triad Electric and Controls overcame challenges and a 40 percent increase in scope to complete more than 800,000 work hours without any safety incidents at Dow Chemical’s Gulfstream Poly B, Train 3 plastics plant.
While installing nearly 190,000 square feet of waterproofing products on a luxurious senior living community in the span of 20 months, Chamberlin Roofing & Waterproofing overcame terrain obstacles, design changes, resident accommodations and time constraints.

TELLIGENT MASONRY LLC
The Signature at Reston Town Center
Reston, Virginia
Boston Properties
Shalom Baranes Associates Architects
Thorntan Tomasetti
HITT Contracting Inc.

Telligent Masonry safely installed approximately one million oversize bricks on The Signature ahead of schedule, requiring several different crews and multiple scaffold systems. Substantial completion of the skin on the 23-story luxury apartment building’s two towers was done in just six months.

INTERIORS: ACOUSTICAL, DRYWALL, MILLWORK OR PLASTER
GMI
Market Square Tower
Houston
Woodbranch Management Inc.
Jackson & Ryan Architects
Walter P Moore
D.E. Harvey Builders Inc.

Greater Metroplex Interiors logged 185,892 work hours to help complete downtown Houston’s tallest multifamily residential building—measuring 41 stories, 745,000 square feet and 463 units—with heavy rainfall from Hurricane Harvey throughout the project.
David Allen Company drew on its 100 years of experience to install nearly 80,000 square feet of tile and natural stone at the one-of-a-kind, 217-room Kimpton Tryon Park Hotel in the heart of uptown Charlotte, North Carolina.

A complex structural design, aesthetic requirements and 30-plus days of rain required innovative solutions and experience working with a highly integrated team for TDIndustries to remain on budget and on time while providing MEP systems for the THR Recovery/Wellness Center in Texas.

M & D Mechanical Contractors installed two high-capacity blowers and the stainless steel piping necessary to transport air below the Neely Henry Dam, effectively raising the dissolved oxygen content in the water to support aquatic life.

RK MECHANICAL designed, fabricated and installed mechanical and plumbing systems for a 48,000-square-foot, world-leading medical research facility on Colorado State University’s veterinary campus, which intends to translate animal research into advancements for humans.

Aggregate Technologies safely removed the I-69 bridge over the San Jacinto River, which was badly damaged by Hurricane Harvey, in just 113 days and under budget.

Fiore & Sons saved the former Hostess Bakery building, a Denver landmark, from demolition and turned it into a new headquarters for the third-generation heavy civil construction company with space for additional tenants.
With more than 600 pieces of equipment being shipped from all over the world, Turner Industries Group’s specialized transportation division was called into action to receive and transport seven pressure vessels to the Shell Tiger AO4 construction jobsite in Geismar, Louisiana.

Despite Hurricane Harvey and devastating floods, Standard Constructors performed a pump station upgrade for Dow Chemical Company in the heart of Lake Jackson without any quality deviations or injuries.

Brasfield & Gorrie self-performed 61 percent of the work on Kiwanis Centennial Park, which has revitalized the area surrounding Birmingham’s iconic Vulcan statue.
Roche Constructors oversaw the retrofit—plus interior and exterior demolition—of a two-story Sports Chalet with an in-ground swimming pool into a bustling Filipino supermarket requiring a specialized HVAC system and fish processing area.

Despite extreme concrete and steel tolerances, record-breaking cold temperatures and working on elevated surfaces, BL Harbert International completed the first of three aerospace testing facilities for Dynetics on time, within budget and with zero incidents.

On this ambitious infill job, Landis Construction squeezed the seven-story Cambria Hotel within the allowable 65-foot height limit—overcoming challenges related to rebuilding a crumbling wall, accessing the site above and within neighboring properties, and switching interior designers mid-project.
Designed and constructed to last at least a century with a focus on efficient workspace and quality materials and construction techniques, LifeWay propelled itself forward as an innovative company providing employees with the spiritual and creative inspiration needed for their important work.

This inspiring project, provided gratis by Poole Anderson, evolved from a minor high school gym renovation into a full design-build job involving numerous stakeholders collaborating to turn a young man’s vision of giving back to his community a reality.

Caddell Construction, in partnership with the U.S. Army Corps of Engineers, completed one of the military’s most sophisticated combat training complexes 84 days ahead of schedule with outstanding safety and quality performance.
Benchmark Construction met all the challenges that came along with building a new cardiovascular lab directly above and around some of the most vital areas of WellSpan Ephrata Community Hospital, including the emergency and maternity departments.

Benchmark Construction built the new Carole and Ray Neag Medical Center on a tight site on a steep incline in the heart of Caron Treatment Center’s active campus.

With a mission to maintain the patient experience, a promise to provide a safe construction site and a goal of minimizing impacts on the working hospital, Broadmoor accepted the challenge to construct a seven-story expansion of Ochsner Medical Center’s West Tower.
DonahueFavret restored a 130-year-old New Orleans church to its original magnificence by using original construction techniques and materials while upgrading all behind-the-scenes MEP systems to the latest technology.

Motivated by the mantra “this place matters,” crews brought Wyoming’s first education center back to life by carefully restoring historical elements on a complicated five-phase high school expansion during which 1,800 students remained on campus.

To increase operating capacity and overall efficiency at the Olin Blue Cube Operations facility, Cajun was charged with the demolition, removal and replacement of a 500,000-pound heat exchanger located within a highly congested unit.
Building Crafts constructed a wastewater pre-treatment facility that generates energy from the biogas produced during the treatment process—reducing environmental impacts and providing Seaboard Triumph Foods with significant savings.

Cobb Vantress Inc. contracted The Weitz Company to design-build a state-of-the-art poultry feed processing facility in Joanna, South Carolina, that has a manufacturing capacity of 2,000 tons per week for grain storage, grinding, mixing, pelleting and cooling.

PCL Industrial Construction built a facility with seven individual generating units that produce approximately 462 megawatts capable of transmitting electricity to the grid within 10 minutes, powering an estimated 400,000 homes in the Oklahoma City area.
Extreme coordination and planning were required for Brasfield & Gorrie to meet the accelerated schedule to replace a railroad swing span with a new 550,000-pound span, all performed over water and with a rail shutdown of only 14 hours.

Shingobee worked closely with the design team to deliver a 12,500-square-foot, net-zero high school that alleviates future operational costs for the district. It is the first net-zero school to be built on tribal land.

Adolfson & Peterson stuck to an aggressive schedule to safely transform and significantly expand an outdated aquatic center into a recreation center that truly meets the community’s needs, contending with mountain wildlife and unearthing natural springs due to the site’s location 7,522 feet above sea level.
As the first major component of Leander, Texas’s transit-oriented development, Austin Community College’s San Gabriel campus features a learning lab integrated with a library and tutoring areas, multipurpose rooms for community use, and open spaces for studying and gathering.

S & B Engineers and Constructors expended more than 1.5 million work hours on the engineering, procurement and construction of a 120,000 barrels-per-day NGL fractionation unit—maintaining the project’s budget and compressed schedule in the face of Hurricane Harvey.

KBR provided EPC services for a three-year, $1.3 billion expansion of Koch’s fertilizer plant on a 650-acre site in Enid, Oklahoma—delivering six major scopes of work on time and on budget through a collaborative team approach.

MEGA-PROJECTS - ALL PROJECTS
OVER $200 MILLION

MEGA-PROJECTS - ALL PROJECTS
$100 MILLION TO $200 MILLION

Eagle Winners
General Contractors/ Construction Management
Serving as construction manager at risk, SpawGlass generated tremendous collaboration across the design and project teams on the 3-acre Confluence Park, which includes three pavilions of giant concrete petals, a rainwater harvesting system, landscaping that represents five Texas ecosystems and a sustainable education center.

Doster Construction was honored to help bring the Equal Justice Initiative’s vision for the National Memorial for Peace and Justice to life in downtown Montgomery, Alabama. The 20,000-square-foot, open-air memorial includes 1,610 corten steel monuments.

Representing the largest capital investment by a Chinese-based company in Tennessee’s history, this 515,000-square-foot advanced manufacturing facility situated on 150 acres allows Wonder Porcelain to introduce proprietary processes not previously utilized in domestic tile production.
Crowder Construction was the design-builder for a first-of-its-kind facility that recharges the Potomac Aquifer, safeguarding the quality of Virginia Beach’s water supply while resolving multiple economic and environmental challenges. The project was delivered within an extremely tight schedule and without a single recordable safety incident.

Lakewood Construction helped synthesize a wealth of ideas from community stakeholders to creatively convert a 1970s office into a flexible, visually impactful chamber of commerce building that reflects the world-class innovation residing within West Michigan.

Rogers-O’Brien led the modernization of the 110-year-old Great Jones Building with an interior renovation that incorporates WeWork’s standard design of high-density occupancy floors to accommodate the diverse needs of its clients.
This Texas A&M chemistry building renovation included upgrades to the MEP infrastructure and new lab casework and fume hoods—with SpawGlass’ project team safely maintaining access to specialized equipment and other building floors throughout construction.

Landis Construction coordinated the fifth and sixth phases of the redevelopment of New Orleans’ Iberville Public Housing Complex—consisting of a mix of historical restoration, rehabilitation and new construction spread across 3.5 acres—all while minimizing disturbance to the surrounding occupied neighborhood.

C. Raymond Davis & Sons gutted a 9,000-square-foot historic residence in an exclusive Philadelphia neighborhood and restored it in line with the Philadelphia Historical Society’s requirements and the owner’s exceptionally strict quality expectations.

MAREK, an 81-year-old family business, is the winner of ABC’s 2018 Contractor of the Year Award in recognition of its history as an innovator, career builder and champion of the construction workforce.

From its early days as a small residential drywall company founded by three brothers, to its current stature as one of the largest commercial specialty contractors in the South with more than 1,500 employees and seven regional offices, MAREK has always relied on the power of its people.

Across generations, its leaders have built a business that prides itself on repeat clients, an impressive project portfolio, a stellar safety record, a revered workforce development program and a dedication to the communities where it works.

MAREK’s craft professionals, known by clients for their strong work ethic and attention to detail, consistently deliver award-winning results in interior construction specialties including drywall, finishes, trims, sound and fire-rated assemblies, acoustical ceilings, coatings, window treatments and wall coverings, while incorporating the latest innovations in materials and technology.

MAREK’s leadership team also demonstrates a commitment to advancing the merit shop values of trust and integrity—serving as one of the founding members of the ABC Houston Chapter and the Dallas-Fort Worth TEXO Chapter, volunteering on several ABC committees and boards, including PAC and the Free Enterprise Alliance, testifying on political and regulatory affairs, and championing the need for investment in immigration reform and apprenticeship programs at the state level and in Washington, D.C.

MAREK lays the foundation for the future of the industry by supporting top-notch education organizations such as NCCER, the Construction Education Foundation in Dallas, the Construction & Maintenance Education Foundation in Houston, Construction Career Collaborative, the Construction Education Foundation of Georgia, and school districts across all MAREK markets.

MAREK is an Accredited Quality Contractor and has achieved STEP Diamond status. The company operates in Austin, Dallas, Harlingen, Houston and San Antonio, Texas, as well as Atlanta and Nashville.
