

Overcome the Challenges of BIM Data

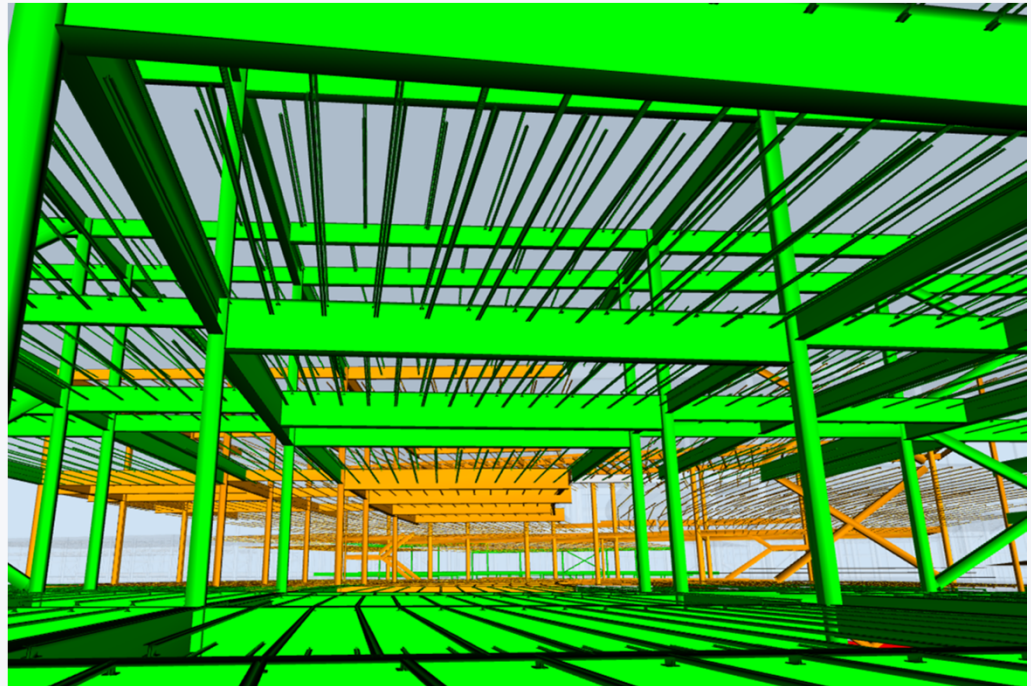

September 28, 2015

Presented By: Brad Hartnagle & Pat Davis

Agenda

Today's Webinar

- Assemble Introduction
- Industry Trends
- Importance of BIM Data
- The Assemble Process
- Demonstration

Win Work. Do Work.

Assemble Helps Project Teams

Access and Manage Model-Data for Improved Design and Construction Management

Web-Based Solution

Extract Data

Add Intelligence

Collaborate in Real-Time

Make Better Decisions

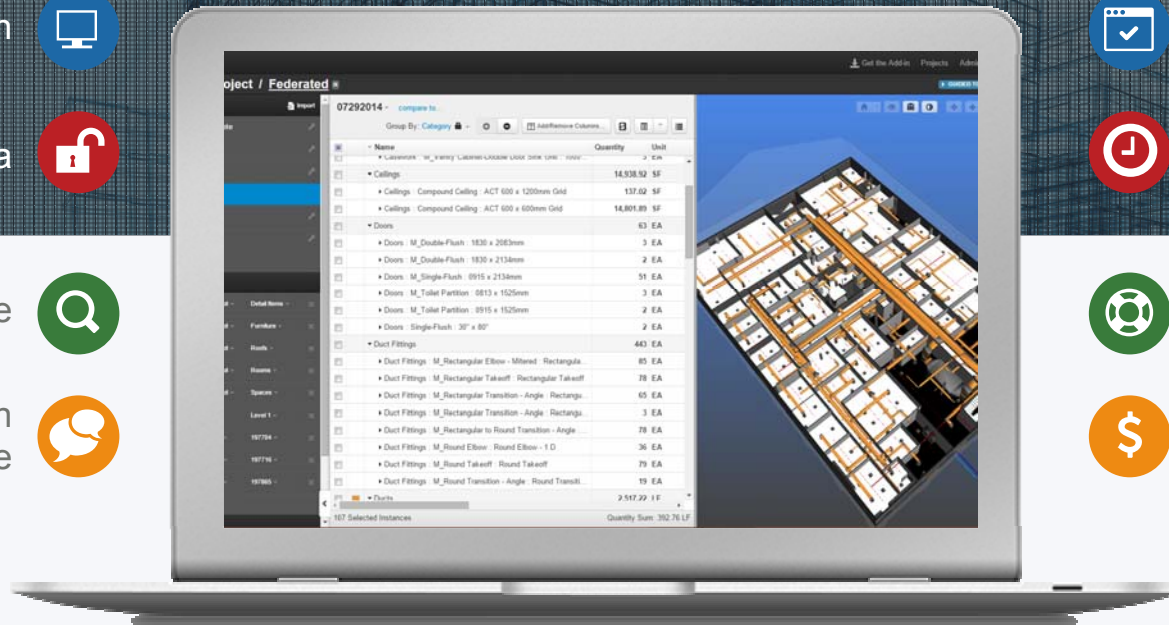

Deliver Budgets On-Time and In Budget

Advanced AEC Workflows

Expand Your BIM Investments

BIM is High in Demand

More owners are requiring BIM deliverables on projects

Top general contractors are using BIM on the majority of their projects

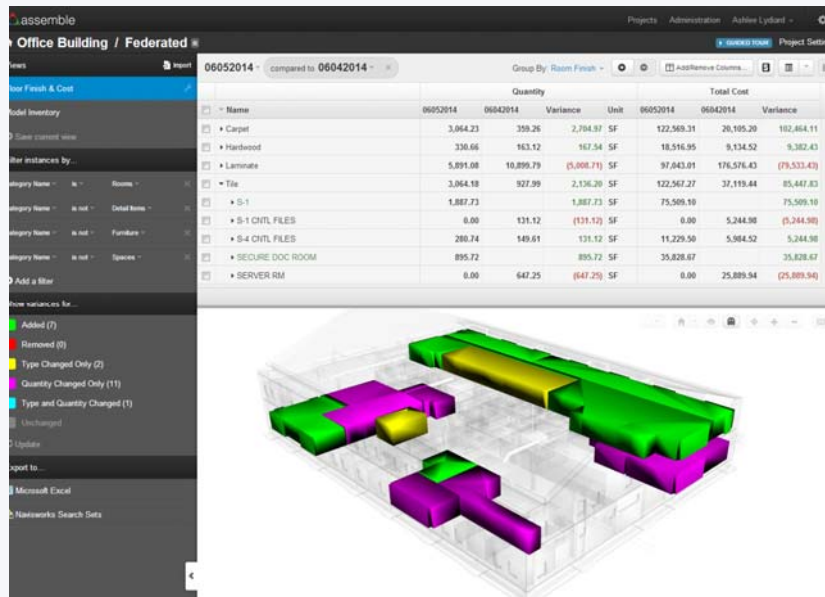

Pre-construction teams and Project Managers are accessing more models on more projects

Few owners and general contractors are realizing the full potential of BIM today

Why Use BIM?

Ask the Questions

Do you know how a model can help you access information?

Are you spending hours of valuable time manually finding building data?

Do you spend hours tracking down information to make design or cost decisions?

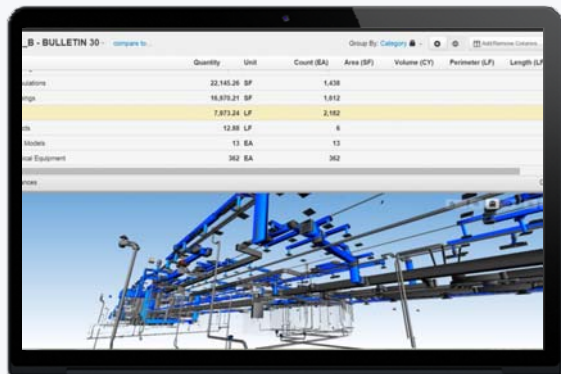

What if you had access to the model data without having access to the model?

Win Work. Do Work.

Access and Manage Model-Data

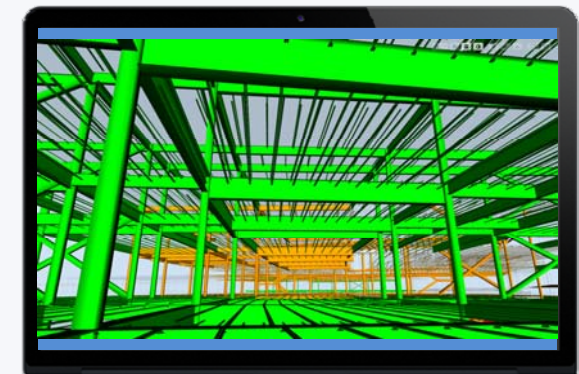

Instant Access to Model Inventories

- Trend Analysis
- Change Management
- Leverage Models and Rapid Takeoff

Manage to Win

- Managing Design Review
- Budget & Schedule Integrity
- Value Engineering Delays

Owner Satisfaction

- Improved Communication
- Retain Clients
- Win Repeat Business

BIM Access for the Entire Team

Model-Data Management

Low-Risk BIM Access

Access to Model Data

No Additional
Hardware

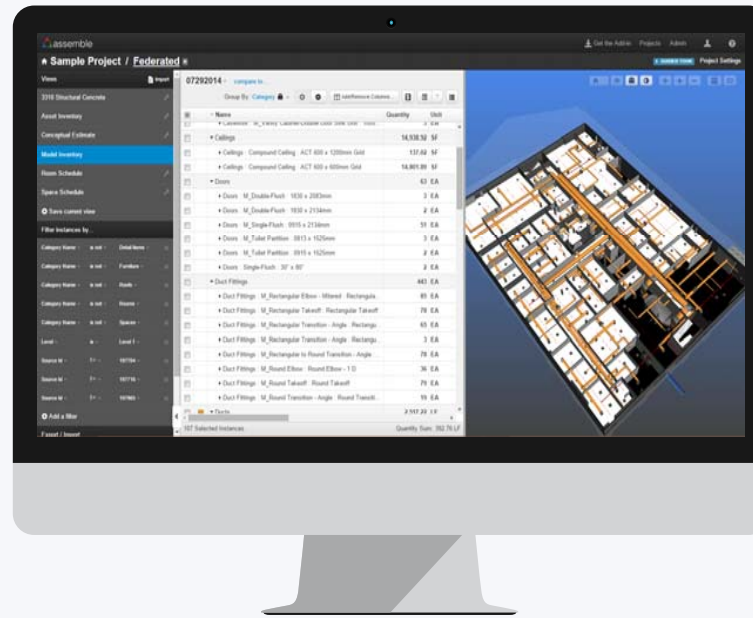

Collaborative

Easy to Deploy

Revit Knowledge Not
Required

Model-Data Management

Real-Time Decision
Making

Improved Model
Quality and Reliability

Increased Bid
Accuracy

Improved AEC
Workflows

Improved Project
Controls

How Assemble Works

Extract Data, Add Intelligence and Collaborate in Real-Time

PUBLISH

Create a complete data inventory of your design in minutes.

MANAGE

Easily access, condition and sync your data to leverage BIM software investments.

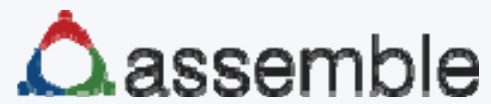

SHARE

Share BIM data with the entire project team.
