# Contractor of the Year Award

# American Infrastructure™

**American Infrastructure** was founded in 1939 by Allan A.

Myers, and his son, Allan C. Myers, as a local hauling firm in

the Philadelphia suburbs. The company continues to operate as

Allan A. Myers in Pennsylvania and Delaware, and as American

Infrastructure in Maryland and Virginia, with 1,800 employees

and nearly \$500 million in annual revenue.

American Infrastructure is a vertically integrated, heavy civil

construction firm and material supplier with a network of

regional construction offices, quarries and asphalt plants in

the Mid-Atlantic states.

What sets American Infrastructure apart from other contractors

is its homegrown safety culture and “Home Safe Tonight” safety

program. Additionally, employees are required to take and pass

numerous safety classes as part of their career training.
