

## PROJECT MANAGEMENT INSTITUTE TESTIMONIALS

*"The class was very informative. There is something for new companies as well as the veterans with 25 years of experience. The **return on investment has already been recognized** through one element of the course."*

*"The class **EXCEEDED my expectations**, and I found myself thinking that this is the information I need. The Purdue Project Management class is without a doubt worth the investment."*

*"This class will save my company big money, Thanks!"*

*"Very vivid, helpful. I hope to show my foreman how little he needs to do to **lower job cost and increase his job profits**."*

*"Everything that was expected ... a homerun!"*

*"The course materials and subject offers project managers the tools to challenge themselves and their company. I view this course as a stepping stone for a successful career in mechanical contracting. Anyone who has participated in this training owes it to their company to promote this program by recruiting other project managers to take the step. Attending this program has provided me with the tools I need to be a strong project manager and the challenge to develop my career."*

*"Having attended other ABC training in the past, I was holding a high bar for this program. Without a doubt, a new height has been set."*

*"That by far has been the most beneficial class I have ever taken concerning Project Management. I think every ABC member should have the owners and their project managers go through this class. It would benefit everyone's business and our whole industry in general. Kirk Alter is a wonderful teacher and has truly found his calling. The knowledge that I learned will help me run a profitable and more organized business for the future. **I honestly made my money back on the class in the first day I was there.**"*
