26th Annual Excellence in Construction® Awards

Top Construction Teams
Exemplary Safety Programs
Champions of Diversity
With the 26th Annual Excellence in Construction® Awards, ABC proudly honors the year’s most outstanding construction projects and contractors for their remarkable achievements in leadership, safety, innovation and diversity.
The Excellence in Construction® Awards honor the skill and creativity of the entire team—contractor, owner, architect and engineer—responsible for an outstanding merit shop construction project. The 2015 award recipients exceeded expectations in innovation and quality.

Accredited Quality Contractor designation for companies* that have documented their commitment to the five key areas of corporate responsibility: quality, safety, employee benefits, training, and community relations and diversity.

New York, N.Y.
Duro Electric donated a significant amount of materials, labor and management time to help renovate two outdated office buildings for a nonprofit organization seeking to expand its community services.

Helix Electric overcame significant delays and challenges while working on this iconic transportation center, finishing on time and within budget through novel approaches such as the use of climbing electricians.

Helix Electric overcame significant schedule challenges to accomplish a fast-track phased completion of a 90,000-square-foot call center with portions delivering in less than 45 days to allow employee training to begin while the call center was completed.
Trio self-performed 90 percent of the electrical work on this six-story office building and five-story precast garage tied into existing structures, also featuring a renovated lobby, 1,750-kilowatt diesel generator and 2000A data center with a modular busway.

ISC maximized efficiency on this 16-week job in a tight workspace by keeping manpower at a peak of 40—ultimately finishing on budget and contributing more than 15,000 manhours without a recordable incident.

MMR Constructors handled electrical system installation and integration on this standalone chemical plant, recording zero incidents over 85,000 manhours and dealing with the complexities of working alongside other contractors and craft professionals.
Haley-Greer design-built this two-story office and meeting facility with a skin comprised of glass, wood and stone—creating a modern day treehouse boasting Double Platinum LEED certification.

Due to the complexity of the custom carvings on this majestic residence, Premier Stonework’s team had to work together to bring this project in on time, exceeding the customer’s expectations for quality and performance.

Precision Walls had to coordinate many custom products with long lead times as part of the construction of two 213,500-square-foot office buildings featuring writable walls, glass-enclosed meeting spaces and other amenities designed to foster flexibility and collaboration among more than 1,000 MetLife employees.
Spacecon performed over 210,000 manhours without a recordable incident on Denver International Airport’s hotel and transit center project—overcoming scaffolding, framing and ceiling challenges with the sky lobby and escalators, as well as a union campaign waged against the firm.

Logging 963,000 safe manhours, TDIndustries leveraged prefabrication, BIM and lean processes on its mechanical and plumbing design-assist work that allowed the owner to occupy this new 1.3 million-square-foot hospital four months ahead of schedule.

SPC served as the design-build mechanical contractor to decentralize Southeastern Baptist Theological Seminary’s steam heating system by providing new energy-efficient heating sources to a large portion of the campus, resulting in 30 percent annual cost savings.

MECHANICAL: COMMERCIAL
$2 TO $10 MILLION

WALDROP MECHANICAL SERVICES
Clemson University Memorial Stadium Suites Renovation
Clemson, S.C.
LS3P Associates, Ltd.
RMF Engineering, Inc.
Turner Construction Company

Waldrop provided HVAC and plumbing design-assist services for Clemson’s $4.8 million football stadium renovation—adhering to a strict 27-week schedule and installing more than 5.5 miles of copper piping.

OTHER SPECIALTY CONSTRUCTION: COMMERCIAL - MORE THAN $1 MILLION

BIG D METALWORKS
Rory Meyers Children’s Adventure Garden
Dallas, Texas
The Dallas Arboretum and Botanical Society, Dallas
Dattner Architects, NYC
Datum Engineers
The BECK Group

Big D maximized teamwork and utilized creative delivery systems to design, fabricate and install unique architectural metals throughout 22 galleries within a complex learning garden.

OTHER SPECIALTY CONSTRUCTION: INDUSTRIAL - LESS THAN $25 MILLION

STANDARD CONSTRUCTORS, INC.
LHC-9 Concrete Piling Installation
Freeport, Texas
DOW Gulfstream
FLUOR

Standard Constructors overcame harsh conditions, unexpected delays and critical time constraints to drive more than 3,000 piles on the LHC-9 block of DOW’s Gulfstream project—completing the monumental task safely, precisely and within the designated six-month time frame.
This design-build civil and environmental restoration project required Kwest Group to navigate live firing schedules and unexploded ordinances while repairing and rehabilitating century-old storm drainage and lagoon systems at Camp Perry, Ohio.

Eagle Winners

Within a tight budget, White Construction re-engineered an outdoor steel structure as a beautiful pergola, providing a restful and scenic space for Special Olympics Texas staff and athletes.

On this design-build job totaling more than 70,000 square feet among five structures, AUI initiated a new prototypical plan resulting in a leaner, expedited project as well as operational efficiencies for the owner.

As general contractor on the third phase of an upscale lifestyle center expansion, Hoar had to drain a lake and install a new retaining wall in addition to constructing a 903-car parking deck, four retail buildings and the pad for a 170,000-square-foot department store.
Hoar donated its general contracting services to build the first facility solely dedicated to PreSchool Partners, a nonprofit helping at-risk children and their families in inner-city Birmingham, Ala.

On this housing renovation project for the U.S. Navy, CMS designed and built a more direct air flow system to improve air quality in the living quarters and leverage sustainability for lower costs and environmental impact.

Under a design-build contract, Brasfield & Gorrie and RQ Construction overcame a historic amount of rain during construction and the challenge of working on an active Marine Corps base to complete this LEED Gold, best-in-class living environment for U.S. Marines.
Integrated teamwork was the key to Nor-Son's success constructing a 22,000-square-foot clinic within budget and a fast-track delivery framework that included multiple contracts and key stakeholders.

Rodgers Builders and its construction team leveraged technology and collaboration to transform an aging structure into a modern, efficient health care facility, with work occurring in the heart of a fully operational hospital campus.

Brasfield & Gorrie logged 560,000 manhours to deliver this complex women’s hospital project on time, within budget and without interrupting campus services—overcoming obstacles through teamwork, planning and intricate scheduling.
SpawGlass breathed new life into this iconic 1930s building to help revitalize downtown Port Arthur, restoring unique atrium, ceiling, window and bank vault elements to meet Texas Historical Commission standards.

Doster’s renovation of a 108-year-old high-rise involved working on a tight urban site and transforming the building for corporate and mixed-use tenants with the help of 3-D laser scanning and other innovative technology.

Cajun worked nearly 112,000 incident- and injury-free manhours while installing 9,625 cubic yards of structural concrete—including a multi-leveled cooling tower that required a specially engineered sheet pile shoring system—to meet CF Industries’ capacity expansion schedule.

   ThyssenKrupp Uhde
GROUP Contractors managed repeated work stoppages and revisions to the critical path while erecting 12 buildings of varied composition for the relocation of an expansive methanol facility from Chile to Louisiana.

Performance Contractors logged 663,000 safe manhours while installing 34 pieces of equipment, 520 tons of steel and 39,000 feet of pipe to expand ExxonMobil’s lube oil production capacity—maintaining the completion date amid 70 percent scope growth.

Despite four years of challenging weather conditions and environmental restrictions, Cianbro devised cost-saving solutions to complete this bridge replacement on schedule, with zero lost-time injuries and with the support of surrounding communities.
DonahueFavret overcame numerous obstacles to renovate a historic New Orleans building to house Tulane University’s LEED Gold-certified School of Social Work, offering nearly 20,000 square feet of study, classroom and meeting spaces.

Harsh weather and poor soil conditions didn’t stop Brasfield & Gorrie from completing this new church—featuring classrooms, a fellowship concourse and an 800-seat sanctuary—on time, under budget and with a 69 percent local workforce.

Adolfson & Peterson performed this occupied renovation and addition in a location with freezing temperatures three-quarters of the year, transforming a rundown school into a 21st century learning environment and the community’s first LEED-certified building.
Extensive preconstruction, BIM coordination and stakeholder collaboration from the initial stages of the project helped R.C. Mathews create this LEED Platinum-certified academic center atop a five-level underground parking garage in the heart of Belmont University’s campus.

Choate led the five-year effort to construct a 343,000-square-foot LEED Silver-certified imaging and research building for the University of North Carolina, using BIM coordination, comprehensive planning and rigorous safety methods to achieve zero lost-time accidents.

Although its contract expanded by 242 percent, TIC – The Industrial Company still met the owner’s original schedule to install a patented resin-in-leach process and complete the structural, mechanical, piping, electrical and instrumentation scopes of work at one of North America’s largest gold mines.
Milender White overcame formidable challenges due to spring flooding and dense wetlands while erecting a 149-foot guyed scientific data collection tower and instrument hut deep within the Choctaw National Wildlife Refuge in southwest Alabama.

Despite site constraints, including a high-voltage power line running through the center of the jobsite, Brasfield & Gorrie successfully managed construction of the largest college video board—reducing a typical 10-month structural scope to just over six months.

Regal Construction provided turnkey design-build services to construct four critical structures in the heart of Marathon’s half-million-barrel-per-day refinery. Totaling 42,000-square-feet, the blast-resistant buildings include 35 offices, four conference rooms and more than 20,000 square feet of fabrication shops.
Black Construction expanded and upgraded Guam’s commercial port, including a new container yard, fire water tank and pumps, power generation and distribution, stormwater control, site utilities, and the disposal of contaminated soil and water during ongoing port operations and without safety incident.

Brasfield & Gorrie developed a cost-effective program for rebuilding 8,000 square feet of a fire-damaged office, wrapping up the project under budget and two weeks early.

Hoar used a custom scaffolding system to complete a renovation of the Cathedral of St. Paul under budget and ahead of schedule despite expansions to the initial scope of work and challenges related to the building’s age, condition and gothic design.
In this design-build renovation for a community nonprofit health provider, Wohlsen Construction overcame a variety of challenges to provide a new medical and dental clinic in what was once an abandoned building on a contaminated brownfield site.

Hoar navigated an urban site—working to prevent disruption to adjacent homeowners and retailers—while demolishing existing apartments to make way for a new 400,000-square-foot complex with 276 luxury residences.

Already working within a compressed schedule, Nor-Son overcame a number of site conditions and accessibility issues in order to design and build this 7,314-square-foot estate in time for the Luxury Home Tour.

SUPPLIER & ASSOCIATE
UNITED RENTALS
Stamford, Conn.
Every year, ABC honors a company that shines above the rest for its corporate integrity, commitment to the professional development and safety of employees, dedication to expert craftsmanship and high esteem in the industry at large.

This year, ABC bestows the Contractor of the Year award on David Allen Company, Raleigh, N.C.

Founded in 1920, the company has grown to become one of the nation’s largest marble, granite, terrazzo, tile and underlayment contractors, with nearly 500 employees and craft professionals.

Its stunning craftsmanship can be seen in the flooring and finishes of just about every major airport on the East Coast, including Ronald Reagan National Airport, Charlotte Douglas International Airport, Miami International Airport and Fort Lauderdale-Hollywood International Airport. The company also has helped transform numerous educational, government, hospitality, institutional, and medical interiors and exteriors into works of art through its meticulous eye for detail and museum-quality installation methods.

David Allen Company’s foundation is built not only on the strengths of its experienced workforce, but also its industry relationships. Many of the company's craft professionals are second- and third-generation employees, while several of its general contracting partners have been doing business with the company for more than 75 years. The leadership team of Chairman Robert Roberson, CEO David Roberson, President Art Odom, Executive Vice President Martin Howard and Secretary-Treasurer Terry Preston collectively have more than 200 years of service with the company.

As a STEP Platinum company, yearly project award winner and activist on the political front, David Allen Company embodies the merit shop philosophy through and through.
