

## SubBase partner success

# KD Construction saved over \$1m with SubBase

KD Construction is a leading contractor specializing in structural cast-in-place concrete and tunnel form construction. With over 60,000 apartments and residential units completed across the Southeast U.S., the company is known for delivering high-quality, large-scale projects.

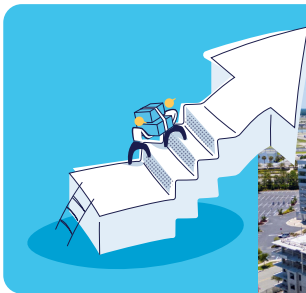

Since implementing SubBase, KD Construction has experienced significant improvements in procurement efficiency, cost savings, and operational transparency.

- ✓ **22% savings on materials:** Centralizing purchasing and leveraging price transparency.
- ✓ **Reduction in processing time:** Accelerating budget updates vendor payments.
- ✓ **Enhanced tracking:** Reducing order disputes and improving accountability.
- ✓ **Optimized procurement:** Real-time analytics and historical spending trends.

“We now have complete visibility into orders, costs, and deliveries, which has significantly improved efficiency.”

Jennifer Hux-Aklar

# With SubBase, KD Construction has strengthened its financial controls and improved overall operational efficiency.

## The challenge

Before adopting SubBase, procurement inefficiencies led to higher operational costs and created unnecessary delays in project timelines, affecting overall productivity.

### **Fragmented procurement processes**

Orders were handled manually through phone calls, emails, leading to miscommunication, duplicated requests, and order delays.

### **Limited price visibility**

Checking supplier pricing was inconsistent, making it difficult to compare costs across vendors and ensure competitive pricing.

### **Manual invoice matching**

Reconciling purchase orders with invoices was time-consuming and prone to errors, increasing administrative workload and delaying vendor payments.

### **Lack of real-time data**

Without a centralized system, procurement teams struggled to monitor spending, track deliveries, and analyze purchasing trends with a real time material database effectively.

## The solution

KD Construction recognized the need for a technology-driven procurement solution that could simplify purchasing and integrate seamlessly with its new accounting software. The company selected SubBase for its:

### **Supplier price visibility**

A customized material database providing real-time pricing from multiple suppliers, reducing the need for manual price checks.

### **Automated procurement workflow**

Digital tracking of field requests, purchase orders, and invoice approvals in one unified system that spoke the language of trade contractors.

### **Seamless accounting integration**

Full compatibility with KD's upgraded accounting software, eliminating manual data entry and reconciliation errors.

### **Delivery & invoice reconciliation**

AI-powered matching of purchase orders, deliveries, and invoices, ensuring greater accuracy and transparency.
